Thin Solid Films 366 (2000) 309–314

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 366

α-Al_2O_3 substrate
Preparation of epitaxial V_2O_3 films on C-, A- and R-planes of α-Al_2O_3 substrates by coating-pyrolysis process, 294
a.c. Plasma display panels
Surface-discharge characteristics of MgO-thin films prepared by reactive RF unbalanced magnetron sputtering, 88
Ag/Fe superlattices
Structure of Ag/Fe superlattices probed at different length scales, 51
AISI 310 stainless steel
Microstructural aspect and oxidation resistance of an aluminide coating on 310 stainless steel, 169
Alloys
High temperature silver-indium joints manufactured at low temperature, 196
Alumina films
Structural analysis of alumina films produced by two-step electrochemical oxidation, 37
Aluminization
Microstructural aspect and oxidation resistance of an aluminide coating on 310 stainless steel, 169
Amorphous materials
Preparation and characterization of $CdTeO_3$ thin films, 82
Thermoelectric power in undoped hydrogenated polymorphous silicon, 207
Annealing
Low temperature synthesis and electrical properties of $PbTiO_3$ thin films prepared by the polymeric precursor method, 232
Microstructure and transport properties of sol–gel fabricated $La_{0.7}Sr_{0.3}MnO_3$ nanocrystalline films on Si(100) substrates, 302
Antimonium selenide
Preparation and characterization of Sb_2Se_3 thin films prepared by electrodeposition for photovoltaic applications, 202
Asymmetric porphyrin
A polymer Langmuir–Blodgett film containing porphyrin chromophore, 255
Atomic force microscopy
Langmuir and Langmuir–Blodgett (LB) films of 4-dicyanomethylene,4H-cyclopenta[2,1–b,3,4–b′]dithiophene, 249
Microstructure and transport properties of sol–gel fabricated $La_{0.7}Sr_{0.3}MnO_3$ nanocrystalline films on Si(100) substrates, 302
Auger electron spectroscopy
Demixing in spin valve structures: an Auger depth profiling study, 129
Quality control of gas sensor microarrays using Auger electron spectroscopy, 265

Bias voltage
Surface-discharge characteristics of MgO-thin films prepared by reactive RF unbalanced magnetron sputtering, 88
Brookite films
Brookite-rich titania films made by pulsed laser deposition, 8

Carbon
Synthesis and characterization of the aligned hydrogenated amorphous carbon nanotubes by electron cyclotron resonance excitation, 11
Ceramic
Surface structures of silicon nitride thin films on Si(111), 121
Chemical mechanical planarization
Pad porosity, compressibility and slurry delivery effects in chemical-mechanical planarization: modeling and experiments, 181
Chemical vapor deposition
Polycyanurate thin film deposition on metals via thermal cyclotrimerisation from the monomer vapor phase, 1
Synthesis and characterization of the aligned hydrogenated amorphous carbon nanotubes by electron cyclotron resonance excitation, 11
Corrosion-resistant erbium oxide coatings by organometallic chemical vapor deposition, 175
Clusters
Competing processes of clustering and mixing of noble metal films embedded in silica under ion irradiation, 284
Coatings
Elastic modulus, indentation pressure and fracture toughness of hybrid coatings on glass, 139
Lubricated sliding wear behaviour of Ni–P–W multilayered alloy coatings produced by pulse plating, 155
Coating-pyrolysis process
Preparation of epitaxial V_2O_3 films on C-, A- and R-planes of α-Al_2O_3 substrates by coating-pyrolysis process, 294
Conductivity
Bias voltage dependence of properties for depositing transparent conducting ITO films on flexible substrate, 4
Langmuir and Langmuir–Blodgett (LB) films of 4-dicyanomethylene,4H-cyclopenta[2,1–b,3,4–b′]dithiophene, 249
Contacts
Ion-beam-deposited ultrathin transparent metal contacts, 272

PII: S0040-6090(00)00932-9

Corrosion
Corrosion-resistant erbium oxide coatings by organometallic chemical vapor deposition, 175
Crystalline quality
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191

Deposition process
CN_x films created by combined laser deposition and r.f. discharge: XPS, FTIR and Raman analysis, 69
Preparation and characterization of Sb_2Se_3 thin films prepared by electrodeposition for photovoltaic applications, 202
Depth profiling
Demixing in spin valve structures: an Auger depth profiling study, 129
Dichroism
A polymer Langmuir–Blodgett film containing porphyrin chromophore, 255
Dielectrics
Growth of RuO_2 thin films by pulsed-laser deposition, 102
Dielectric properties
Preparation and characterization of $CdTeO_3$ thin films, 82
Low temperature synthesis and electrical properties of $PbTiO_3$ thin films prepared by the polymeric precursor method, 232
Diffusion
Competing processes of clustering and mixing of noble metal films embedded in silica under ion irradiation, 284

Elastic properties
Elastic modulus, indentation pressure and fracture toughness of hybrid coatings on glass, 139
Electrical properties and measurements
Thermoelectric power in undoped hydrogenated polymorphous silicon, 207
Direct determination of the absorption of porous silicon by photocurrent measurement at low temperature, 216
Electrical properties
Photoelectrical characterization of Schottky junctions between poly(4*h*-cyclopenta[2,1–*b*:3,4–*b'*]dithiophene) and aluminium: effect of hexadecyl groups in 4 position, 211
Electrochemical deposition
Localized electrochemical deposition of metals using micropipettes, 32
Electron microscopy
Electron microscopic study of the epitaxial growth of thin single crystalline tellurium films on NaCl (001), 100
Electronics
Thermoelectric power in undoped hydrogenated polymorphous silicon, 207
Ellipsometry
Optical characterization of thin films with randomly rough boundaries using the photovoltage method, 43
Epitaxy
Structure of Ag/Fe superlattices probed at different length scales, 51
Electron microscopic study of the epitaxial growth of thin single crystalline tellurium films on NaCl (001), 100
Surface structures of silicon nitride thin films on Si(111), 121
Preparation of epitaxial V_2O_3 films on C-, A- and R-planes of α-Al_2O_3 substrates by coating-pyrolysis process, 294
Erbia
Corrosion-resistant erbium oxide coatings by organometallic chemical vapor deposition, 175
Evaporation
Investigation of the surface morphology of thermally evaporated thin gold films on mica, glass, silicon and calcium fluoride substrates by scanning tunneling microscopy, 111
Ferroelectric and polymeric precursor
Low temperature synthesis and electrical properties of $PbTiO_3$ thin films prepared by the polymeric precursor method, 232
Fluorescence
Effect of magnetic field on growth of p-quaterphenyl thin films, 279
Fluxless bonding, Indium
High temperature silver-indium joints manufactured at low temperature, 196
Fourier transform infrared spectroscopy
Synthesis and characterization of the aligned hydrogenated amorphous carbon nanotubes by electron cyclotron resonance excitation, 11

Gold
Investigation of the surface morphology of thermally evaporated thin gold films on mica, glass, silicon and calcium fluoride substrates by scanning tunneling microscopy, 111
Growth mechanism
Effect of magnetic field on growth of p-quaterphenyl thin films, 279

Hardness
Nanoindentation study on the mechanical properties of Tic/Mo multilayers, 117
Elastic modulus, indentation pressure and fracture toughness of hybrid coatings on glass, 139
High temperature oxidation
Microstructural aspect and oxidation resistance of an aluminide coating on 310 stainless steel, 169

Indium chalcogenides
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191
Indium tin oxide
Bias voltage dependence of properties for depositing transparent conducting ITO films on flexible substrate, 4
Infrared spectroscopy
Polycyanurate thin film deposition on metals via thermal cyclotrimerisation from the monomer vapor phase, 1
CN_x films created by combined laser deposition and r.f. discharge: XPS, FTIR and Raman analysis, 69
Intergrowth film
Intrinsic Josephson junctions in Bi2212 and Bi2223 intergrowth films, 77
Intermetallic compound
Microstructural aspect and oxidation resistance of an aluminide coating on 310 stainless steel, 169
Intrinsic Josephson
Intrinsic Josephson junctions in Bi2212 and Bi2223 intergrowth films, 77

Ion bombardment
Nanoindentation study on the mechanical properties of Tic/Mo multilayers, 117
Competing processes of clustering and mixing of noble metal films embedded in silica under ion irradiation, 284
Ion implantation
Medium-temperature plasma immersion-ion implantation of austenitic stainless steel, 150
Kelvin probe
Energy structures of molecular semiconductors contacting metals under air studied by the diffusion potential measurements and the Kelvin probe technique, 237

Langmuir–Blodgett films
Langmuir and Langmuir–Blodgett (LB) films of 4-dicyanomethylene,4H-cyclopenta[2,1–b,3,4–b′]dithiophene, 249
A polymer Langmuir–Blodgett film containing porphyrin chromophore, 255
Laser
CN_x films created by combined laser deposition and r.f. discharge: XPS, FTIR and Raman analysis, 69
Laser ablation
Brookite-rich titania films made by pulsed laser deposition, 8
Growth of RuO_2 thin films by pulsed-laser deposition, 102
Lead titanate
Low temperature synthesis and electrical properties of $PbTiO_3$ thin films prepared by the polymeric precursor method, 232
Low energy electron diffraction
Surface structures of silicon nitride thin films on Si(111), 121
Lubrication
Lubricated sliding wear behaviour of Ni–P–W multilayered alloy coatings produced by pulse plating, 155
Lubrication model
Pad porosity, compressibility and slurry delivery effects in chemical-mechanical planarization: modeling and experiments, 181
Luminescence
Electrostatically self-assembled poly(4-vinylpyridine-co-vinylpyridinium-chloride)-based LED, 260

Magnetic structures
Demixing in spin valve structures: an Auger depth profiling study, 129
Magnetoresistance
Microstructure and transport properties of sol–gel fabricated $La_{0.7}Sr_{0.3}MnO_3$ nanocrystalline films on Si(100) substrates, 302
Magnetron sputtering
Highly transparent and conductive rare earth-doped ZnO thin films prepared by magnetron sputtering, 63
Metal-oxide semiconductor structure
New sputter process for VO_2 thin films and examination with MIS-elements and *C–V*-measurements, 28
MgO-thin films
Surface-discharge characteristics of MgO-thin films prepared by reactive RF unbalanced magnetron sputtering, 88
Microarray
Quality control of gas sensor microarrays using Auger electron spectroscopy, 265
Monolayer
A polymer Langmuir–Blodgett film containing porphyrin chromophore, 255
Multilayers
Demixing in spin valve structures: an Auger depth profiling study, 129
Electrostatically self-assembled poly(4-vinylpyridine-co-vinylpyridinium-chloride)-based LED, 260
Lubricated sliding wear behaviour of Ni–P–W multilayered alloy coatings produced by pulse plating, 155
Nanoindentation study on the mechanical properties of Tic/Mo multilayers, 117
Multilayered structures
Structure of Ag/Fe superlattices probed at different length scales, 51

Nanostructures
Nanoindentation study on the mechanical properties of Tic/Mo multilayers, 117
Submicron metal oxide structures by a sol–gel process on patterned substrates, 135
Nanotubes
Synthesis and characterization of the aligned hydrogenated amorphous carbon nanotubes by electron cyclotron resonance excitation, 11
Nitrogen
Rate-limiting steps during nitrogen incorporation in furnace grown silicon oxynitrides: effects on wafer-to-wafer uniformity, 225
Numerical simulations
Localized electrochemical deposition of metals using micropipettes, 32

Optical properties
Bias voltage dependence of properties for depositing transparent conducting ITO films on flexible substrate, 4
Optical characterization of thin films with randomly rough boundaries using the photovoltage method, 43
Preparation and characterization of $CdTeO_3$ thin films, 82
Direct determination of the absorption of porous silicon by photocurrent measurement at low temperature, 216
Optics and opto-electronics
Thermoelectric power in undoped hydrogenated polymorphous silicon, 207
Optoelectronic devices
Ion-beam-deposited ultrathin transparent metal contacts, 272
Organic semiconductors
Energy structures of molecular semiconductors contacting metals under air studied by the diffusion potential measurements and the Kelvin probe technique, 237
Ion-beam-deposited ultrathin transparent metal contacts, 272
Organic substances
Effect of magnetic field on growth of p-quaterphenyl thin films, 279
Oxides
Growth of RuO_2 thin films by pulsed-laser deposition, 102
Preparation and characterization of $CdTeO_3$ thin films, 82

Phase-transitions
New sputter process for VO_2 thin films and examination with MIS-elements and *C–V*-measurements, 28
Photoconductivity
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191
Direct determination of the absorption of porous silicon by photocurrent measurement at low temperature, 216
Photovoltage
Optical characterization of thin films with randomly rough boundaries using the photovoltage method, 43
Physical vapour deposition
New sputter process for VO_2 thin films and examination with MIS-elements and *C–V*-measurements, 28
Electron microscopic study of the epitaxial growth of thin single crystalline tellurium films on NaCl (001), 100
Ion-beam-deposited ultrathin transparent metal contacts, 272
Plasma processing and deposition
Medium-temperature plasma immersion-ion implantation of austenitic stainless steel, 150
Plutonium
Corrosion-resistant erbium oxide coatings by organometallic chemical vapor deposition, 175
Polish pad properties
Pad porosity, compressibility and slurry delivery effects in chemical-mechanical planarization: modeling and experiments, 181
Poly(4H-cyclopenta[2,1–*b*:3,4–*b'*]dithiophene)
Photoelectrical characterization of Schottky junctions between poly(4*h*-cyclopenta[2,1–*b*:3,4–*b'*]dithiophene) and aluminium: effect of hexadecyl groups in 4 position, 211
Polycrystalline films
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191
Polymers
Polycyanurate thin film deposition on metals via thermal cyclotrimerisation from the monomer vapor phase, 1
A polymer Langmuir–Blodgett film containing porphyrin chromophore, 255
Electrostatically self-assembled poly(4-vinylpyridine-co-vinylpyridinium-chloride)-based LED, 260
Pulsed laser deposition
Violet and UV luminescence emitted from ZnO thin films grown on sapphire by pulsed laser deposition, 107
Pyrolysis
Influence of Al, In, Cu, Fe and Sn dopants in the microstructure of zinc oxide thin films obtained by spray pyrolysis, 16

Radiation damage
Competing processes of clustering and mixing of noble metal films embedded in silica under ion irradiation, 284
Raman scattering
Brookite-rich titania films made by pulsed laser deposition, 8
CN_x films created by combined laser deposition and r.f. discharge: XPS, FTIR and Raman analysis, 69
Ultraviolet and visible Raman studies of nitrogenated tetrahedral amorphous carbon films, 169
Raman spectroscopy
Langmuir and Langmuir–Blodgett (LB) films of 4-dicyanomethylene,4H-cyclopenta[2,1–b,3,4–b']dithiophene, 249
Rare-earth oxide
Corrosion-resistant erbium oxide coatings by organometallic chemical vapor deposition, 175
Reflection spectroscopy
Optical characterization of thin films with randomly rough boundaries using the photovoltage method, 43
Resistivity
Violet and UV luminescence emitted from ZnO thin films grown on sapphire by pulsed laser deposition, 107
Ruthenium
Growth of RuO_2 thin films by pulsed-laser deposition, 102

Scanning electron microscopy
Influence of Al, In, Cu, Fe and Sn dopants in the microstructure of zinc oxide thin films obtained by spray pyrolysis, 16
Scanning ion-conductance microscopy
Localized electrochemical deposition of metals using micropipettes, 32
Scanning probe lithography
Localized electrochemical deposition of metals using micropipettes, 32
Scanning tunneling microscopy
Investigation of the surface morphology of thermally evaporated thin gold films on mica, glass, silicon and calcium fluoride substrates by scanning tunneling microscopy, 111
Surface structures of silicon nitride thin films on Si(111), 121
Schottky barrier
Photoelectrical characterization of Schottky junctions between poly(4*h*-cyclopenta[2,1–*b*:3,4–*b'*]dithiophene) and aluminium: effect of hexadecyl groups in 4 position, 211
Energy structures of molecular semiconductors contacting metals under air studied by the diffusion potential measurements and the Kelvin probe technique, 237
Secondary ion mass spectrometry
Rate-limiting steps during nitrogen incorporation in furnace-grown silicon oxynitrides: effects on wafer-to-wafer uniformity, 225
Semiconductors
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191
Rate-limiting steps during nitrogen incorporation in furnace-grown silicon oxynitrides: effects on wafer-to-wafer uniformity, 225
Sensors
Quality control of gas sensor microarrays using Auger electron spectroscopy, 265
Silicon
Surface structures of silicon nitride thin films on Si(111), 121
Thermoelectric power in undoped hydrogenated polymorphous silicon, 207
Direct determination of the absorption of porous silicon by photocurrent measurement at low temperature, 216
Silicon nitride
Surface structures of silicon nitride thin films on Si(111), 121
Silicon oxide
Quality control of gas sensor microarrays using Auger electron spectroscopy, 265

Silicon oxynitrides
Rate-limiting steps during nitrogen incorporation in furnace-grown silicon oxynitrides: effects on wafer-to-wafer uniformity, 225
Silver
High temperature silver-indium joints manufactured at low temperature, 196
Sputtering
Bias voltage dependence of properties for depositing transparent conducting ITO films on flexible substrate, 4
Steel
Medium-temperature plasma immersion-ion implantation of austenitic stainless steel, 150
Stoichiometry
Violet and UV luminescence emitted from ZnO thin films grown on sapphire by pulsed laser deposition, 107
Stress
Elastic modulus, indentation pressure and fracture toughness of hybrid coatings on glass, 139
Structural analysis
Structural analysis of alumina films produced by two-step electrochemical oxidation, 37
Structure characterization
Structure of Ag/Fe superlattices probed at different length scales, 51
Superconductivity
Intrinsic Josephson junctions in Bi2212 and Bi2223 intergrowth films, 77
Surface morphology
Intrinsic Josephson junctions in Bi2212 and Bi2223 intergrowth films, 77
Surface roughness
Investigation of the surface morphology of thermally evaporated thin gold films on mica, glass, silicon and calcium fluoride substrates by scanning tunneling microscopy, 111

Tellurium
Electron microscopic study of the epitaxial growth of thin single crystalline tellurium films on NaCl (001), 100
Ternary compounds
Photoconductivity of textured γ-$In_2Se_{3-x}Te_x$ ($0 \leq x \leq 0.5$) thin films, 191
Tetrahedral amorphous carbon (ta–C) films
Thermal conduction in metalized tetrahedral amorphous carbon (ta–C) films on silicon, 95
Tetrahedral amorphous carbon
Ultraviolet and visible Raman studies of nitrogenated tetrahedral amorphous carbon films, 169
Thermal conduction
Thermal conduction in metalized tetrahedral amorphous carbon (ta–C) films on silicon, 95
Thermal desorption
Polycyanurate thin film deposition on metals via thermal cyclotrimerisation from the monomer vapor phase, 1
Thin films
Highly transparent and conductive rare earth-doped ZnO thin films prepared by magnetron sputtering, 63
Preparation and characterization of Sb_2Se_3 thin films prepared by electrodeposition for photovoltaic applications, 202
Titanium oxide
Brookite-rich titania films made by pulsed laser deposition, 8
Submicron metal oxide structures by a sol–gel process on patterned substrates, 135
Transmission electron microscopy
Influence of Al, In, Cu, Fe and Sn dopants in the microstructure of zinc oxide thin films obtained by spray pyrolysis, 16
Transparent conducting oxide film
Highly transparent and conductive rare earth-doped ZnO thin films prepared by magnetron sputtering, 63
Transparent electrode
Highly transparent and conductive rare earth-doped ZnO thin films prepared by magnetron sputtering, 63
Tribology
Medium-temperature plasma immersion-ion implantation of austenitic stainless steel, 150
Lubricated sliding wear behaviour of Ni–P–W multilayered alloy coatings produced by pulse plating, 155
Tungsten oxide
Submicron metal oxide structures by a sol–gel process on patterned substrates, 135
Tunneling
Microstructure and transport properties of sol–gel fabricated $La_{0.7}Sr_{0.3}MnO_3$ nanocrystalline films on Si(100) substrates, 302
Two-step electrochemical oxidation
Structural analysis of alumina films produced by two-step electrochemical oxidation, 37

Unbalanced magnetron sputtering
Surface-discharge characteristics of MgO-thin films prepared by reactive RF unbalanced magnetron sputtering, 88
UV photoluminescence
Violet and UV luminescence emitted from ZnO thin films grown on sapphire by pulsed laser deposition, 107

V_2O_3 thin film
Preparation of epitaxial V_2O_3 films on C-, A- and R-planes of α-Al_2O_3 substrates by coating-pyrolysis process, 294
Vanadium oxide
New sputter process for VO_2 thin films and examination with MIS-elements and *C–V*-measurements, 28

Wafer scale model
Pad porosity, compressibility and slurry delivery effects in chemical-mechanical planarization: modeling and experiments, 181
Wetting
Submicron metal oxide structures by a sol–gel process on patterned substrates, 135
Work function
Energy structures of molecular semiconductors contacting metals under air studied by the diffusion potential measurements and the Kelvin probe technique, 237

X-ray diffraction
Preparation and characterization of Sb_2Se_3 thin films prepared by electrodeposition for photovoltaic applications, 202
Effect of magnetic field on growth of p-quaterphenyl thin films, 279

X-ray photoelectron spectroscopy
CN_x films created by combined laser deposition and r.f. discharge: XPS, FTIR and Raman analysis, 69
X-ray scattering
Electrostatically self-assembled poly(4-vinylpyridine-co-vinylpyridinium-chloride)-based LED, 260
Zinc oxide
Influence of Al, In, Cu, Fe and Sn dopants in the microstructure of zinc oxide thin films obtained by spray pyrolysis, 16
Highly transparent and conductive rare earth-doped ZnO thin films prepared by magnetron sputtering, 63
Violet and UV luminescence emitted from ZnO thin films grown on sapphire by pulsed laser deposition, 107
